

# Why Should I Get a COVID-19 Vaccine?

Getting vaccinated helps you, your family, and your community.

## You

- More Than -  
**97%**  
of people who  
go to hospitals  
are **not vaccinated**

- More Than -  
**99%**  
of people who  
die from **COVID-19**  
are **not vaccinated**

Getting the vaccine is the best way to protect **yourself** from getting very sick or dying from COVID-19.

## Your Family

After you get the vaccine, you may be less likely to give COVID-19 to the people you care about.

The vaccine helps you protect **your family and friends** who might get COVID-19 — like kids who are still too young for a shot.

## Your Community

When more people are vaccinated...

**1** The COVID-19 virus has a harder time creating variants — like the Delta variant.

**2** Fewer people go to the hospital for COVID-19, which makes it easier for everyone to get the care they need.

Vaccinating against COVID-19 help keeps **your community** safe and healthy.

Talk to your healthcare provider about the COVID-19 vaccine.

Americares is a health-focused relief and development organization that responds to people affected by poverty or disaster with life-changing health programs, medicine, medical supplies and emergency aid.
