# Can I Get a COVID-19 Booster Shot?

The COVID-19 virus changes over time. Our bodies' defenses need to change with it to keep us safe. Booster shots of COVID-19 vaccines help our bodies keep up with the changing virus. This guide will help you decide if you are currently eligible for a booster shot.

START

Are you fully vaccinated against COVID-19?

- **I don't know** → Look at the other side of the poster to find out!
- **No** → Get Vaccinated!
- **Yes** ↓

Which COVID-19 vaccine did you get?

Pfizer	Moderna	Johnson and Johnson (J&J)
When did you get your second dose of the Pfizer vaccine?	When did you get your second dose of the Moderna vaccine?	When did you get your first dose of the J&J vaccine?

Pfizer:
- I haven't gotten my second dose yet.
- Less than 5 months ago
- More than 5 months ago → **How old are you?**
  - 0-11 years old
  - 12+ years old

Moderna:
- I haven't gotten my second dose yet.
- Less than 5 months ago
- More than 5 months ago

Johnson and Johnson (J&J):
- Less than 2 months ago
- More than 2 months ago

No, you cannot get a booster shot at this time.

Yes, you can and should get a booster shot today.

Even if you can't get a booster shot right now, you'll need to get boosted as soon as you are able. Booster shots offer the best defense against getting very sick from the Omicron variant.
