- •Use of COVID-19 Vaccines in the U.S.

*People who have received a monovalent booster shot should get a bivalent booster shot 2 months after their most recent monovalent booster shot.

†People 18 years old and older can choose to get a monovalent Novavax booster dose if they meet three criteria: 1) they've completed a primary series using any COVID-19 vaccine at least six months ago, 2) they've not received any previous booster dose(s), and 3) they are unable or unwilling to receive an mRNA vaccine.

*The J&J vaccine should only be used under special conditions. See here: https://www.cdc.gov/vaccines/covid-19/clinical-considerations/ interim-considerations-us-appendix.html#appendix-a
